

Title: Can AI code? do we need to learn coding in 2026?

Backup title: more suggestive title

Thumbnail (the picture): Two halves.

Left side: the party page blowing up with confetti. Bright. Looks amazing.

Right side: the same page, but the guest list is empty. Zero names. A red circle around the empty box.

Big words on top: **NOBODY CAME**

Arjun in the corner, small, looking proud (he doesn't know yet).

WHO'S IN IT

- **Arjun (HR)** — Chandra... He's sure of himself. That's the joke: the guy who's most sure knows the least.
- **Meera (Developer)** — Niyati... she's the smart one. She holds a laptop the whole time so she always has something to do. She never brags. She just knows.
- **Anjali (runs the meeting), Sudha, and 4 other people.**
- **The camera guy** — you never see him. He talks sometimes. (Just his voice.)

HOW TO SHOOT IT (Batching)

1. Interview bits first - both people, one wall and a seat with teleprompter
2. The group meeting scene next
3. The desk scenes - Arjun first, then Meera.
4. The empty-room ending last.

PART 1 — THE START (open on the mess) — 0:00

Start on the party page blowing up. This is the same picture from the thumbnail

ARJUN (*handycam in cafeteria with laptop and coffee*):

"Ten minutes broo... I just built the whole thing in just ten minutes. "

(some b-rolls of celebrating and singing)

(beat)

ANJALI (*comes and sit in Interview*):

"he said what?! No, nobody could come to the party."

(cut to black.)

TITLE ON SCREEN: WE (WHO) LET THE GUY WHO CAN'T CODE BUILD OUR WEBSITE WITH AI!

PART 2 — HOW IT STARTED — 0:15

(*The meeting room. Six people. A whiteboard that just says PARTY.*)

(*Random speaking noises*)

(*Small words underneath: "Tuesday. Three hours before this."*)

ANJALI: should we go with green? or orange?...

(*Sudha starts to answer. Doesn't get to. That's the meeting.*)

Orange.

ANJALI: wait, we might need a sign-up page so people can RSVP, so I know how much food to order. (*Let her ramble a bit more here.*)

(*Sleeping in the meeting, camera to arjun*)

ARJUN: I'll do it (cut Anjali speaking in between)

ANJALI (confused): Ahn...you'll do what?

Look at camera: HR told me to participate in more activities, yes, I'm the HR (and then nod)

Ehh what she told?

Someone whispering website in ears

ARJUN: the website bro... I do our internal graphics like this all the time. I just ask the AI to make, and it makes in just 2 minutes...

(discussing)

(Meera is confused ... huh what)

PART 3 — THE REAL QUESTION

MEERA *(Interview):* he's going to ask the AI for a website, and it's going to give him a website. that's the part people get wrong.

They think making it is the hard part. It's not, that's the easy part now, you ask and it makes it. The hard part is knowing what it left out. Because it will leave things out and it won't tell you, it'll just hand you something that looks finished.

ARJUN *(Interview):* see, Meera is great, actually she is a really good developer. But you know what? Meera can't finish any project in an hour."

(cut to both arjun and Meera in a sofa)

CAMERA GUY: "Can I ask you something?"

ARJUN: Sure...

CAMERA GUY: SAY THIS: "It's 2026... Now The AI can write the code. So, why should someone want to learn coding at this point?"

ARJUN: THANK you... see, he gets it. *(turn to meera)* it's a fair question, right?

MEERA *(laughing to camera):* "It's a fair question."

ARJUN *(to camera, cocky):* I mean... I could build the whole site right now that too faster than her...

MEERA *(flat):* In your dreams (and laughs)

ARJUN: Bro she is just scared...

(meera starts shouting and arjun and there is a banter)

(ahh roman rempire music with slow mo fighting)

(beat.)

PART 4 — THE CONTEST — 0:55

CAMERA GUY: "Guys behave... (arjun makes faces) (meera tries to pinch)

Let's do one thing, we will do a challenge... I'm gonna give you guys the Same AI and one hour... Let's see what you guys can do"

ARJUN: Haha just give me the trophy now...

MEERA: First of all, there's no trophy...

ARJUN: First of all, there's no trophy... (mocking way)

MEERA: (someone passes in office and smiles): wait, why am I even doing this?

CAMERA GUY: "Meera."

MEERA *(long pause)*: say something like: ... yaaaa

ARJUN *(nice, no meanness)*: See it's 2026 Meera a five-year-old can use AI now and make websites

MEERA: "I've been writing code for six years."

"Do you think like i dont know AI?"

(start riser)

Guys lets go, timer already started (they will start running)

PART 5 — MAKING IT + THE BIG MOMENT — 1:30

(Arjun's desk. He types one line. Hits enter. Sits back. Nods at the screen like he's proud of it.)

(Show his message on screen: " hey!! hope you're doing well 🙏 can you please build the most BEAUTIFUL office party invite page in the world. make it grand. make it crazy.

sigma energy and gigachad layout i want people to open this and go BUZZIN. looksmaxx it much and no rush!! take your time!! thank you so much 🙏🙏)

ARJUN: yeah boy... that's good. take your time.

ARJUN *(smiles to camera)*: See first you gotta be nice to it. it works harder when you're nice.

(Meera's desk. She's reading. Holding the laptop. Nothing's happening yet.)

CAMERA GUY: Meera, are you going to start or what?

MEERA: I have started.

CAMERA GUY: you're just reading the code...

MEERA: yes... we need a RSVP button and there is a issue there

CAMERA GUY: Button in a party page?

MEERA: "Yea that's how i register right... It's a crucial part..."

MEERA: okay listen, so a button is actually two things—

CAMERA GUY: oh wait wait wait, can you me like you are explaining it to a 5 yo old...

MEERA *(stops. gives up on the big explanation)*: ...okay. a button is a picture which shows in the front and a little note that stays behind says what's gonna happen when you click it.

CAMERA GUY: "okay"

MEERA *(picking the laptop back up)*: "The AI is very good at the picture, so the AI does the picture but Somebody still gotta click it and then it should lead us somewhere right? Some action should be there..."

(Across the room. Arjun stands up. Arms out.)

ARJUN: SAY THIS: "DONE."

MEERA: ...it's been eight minutes.

ARJUN: "DONE."

MEERA *(Interview)*: I explained a button to a grown man with a camera and lost eight minutes by the time this guy finished it.(sighs) Its okay I'll do it

(Arjun's screen. It's beautiful. Confetti. A countdown. A photo of a party that never happened, with people who don't exist. The group comes over. Someone says "ohhh.")

ANJALI: ohhh that's lovely, Arjun.

ARJUN *(interview)*: She said lovely (and then smiles) I think she likes me (heart music and overlay)

(Meera checking arjun website & frowning.)

MEERA: I can't find any RSVPs here, i just clicked the button and it does nothing

CAMERA GUY: so, RSVP doesn't work?

MEERA: no, it...

I tried to click on it, but it doesnt do anything... so yeah

Also this music gives me headache (vanga boys party music)

ARJUN *(vibing to the music)* It's so woوو and everybody turns in office (rock signs in hand)

ARJUN: dude, you're doing it the hard way.

MEERA: I'm reading the code.

ARJUN: haha who reads the code, nobody reads it.

MEERA: that's the— *(stops)*

ARJUN *(not mean)*: that's the what??

MEERA *(beat)*: ...nothing.

ARJUN *(Interview)*: Am i getting something wrong? No i have AI and it's so good.

you should see my website its cool...

PART 6 — THE CLICK

(Everyone gathers.)

CAMERA GUY: Okay guys now its time for reveal let's start with Meera first.

(shows the page and click. A plain white page. "You're in Anjali. Nachos at 6." Anjali shows up on a list.)

ANJALI: okay i thought of orange... but... it's very... white.

MEERA: it works (nods head to side)

ANJALI: yaaa.. it's just white though.

CAMERA GUY: Okay now its Arjun

(click. The page EXPLODES. Confetti. Music. A QR code. Someone says "ohhh." Same footage as the very start.)

ANJALI: This looks so cool not white, confettis, music the whole website screen its a party

ARJUN: SEE—

ANJALI: Ahh wait...where did my name go?

ARJUN: what?

ANJALI: am I on the list?

ARJUN: there's a— *(looking)* there's a—

ANJALI *(scrolling)*: ...there's no list.

(quiet.)

(Meera doesn't move. Doesn't gloat. Says nothing.)

ARJUN *(takes his glasses off)*: it... goes...

(He points at the screen. Then up.)

ARJUN: SAY THIS: "...it goes into the vibe."

(people disappointed)

MEERA (*not enjoying this*): you asked for a beautiful invite.

ARJUN: yeah...

MEERA: So it made you a beautiful invite.

ARJUN (*waiting for more*): ...and?

MEERA (*beat*): that's it. that's the whole thing. that's all that happened.

PART 7 — THE POINT — 4:25

ARJUN: but it is not working.

MEERA: (tech explanation)

CAMERA GUY: SAY THIS: "Guys im confused"

MEERA (*turns to camera*): **SAY THIS**: "Remember the button?"

CAMERA GUY: "picture and a note"

MEERA: SAY THIS: "He asked for the picture. He didn't know about the note."

CAMERA GUY: so, how to write the note?

MEERA: SAY THIS:

okay. when I look at a page I'm not really looking at it. I'll be thinking of how it works, where does this take me, someone types their name in that box, and then what, where does it end up. if I can't answer that, it doesn't work yet. doesn't matter how pretty it is.

CAMERA GUY: ohh but how do you find out?

MEERA: I simply use it. I put my own name in and press the button and go check if it showed up. that's called testing it may sound boring but it's the entire job.

CAMERA GUY: and if it didn't show up?

MEERA: oh my 5 year old kid, then I go find out why? that's the other half. you don't guess, you go looking, and you keep going until you find the exact thing that broke. that's debugging.

CAMERA GUY: is that hard?

MEERA: (beat) it's annoying. it's not hard. anyone can do it its just that most people just doenst know something like that in loop. thats why you guys need developers.

“So basically, somebody should know that there is a note in the first place to make it exist”

THE ONE PITCH LINE — film it two ways

Way 2: MEERA (*plain, to camera*): any kid we teach would've clicked that button because they really understand how coding and AI works.

(CODEYOUNG LOGO — 4 seconds. No talking.)

PART 8 — THE LAST BIT — 5:05

(Empty room. Everyone's gone. Arjun alone with his beautiful page, confetti still falling on nobody.)

(He clicks the button. Confetti. Music. Nothing happens.)

(He clicks it again.)

Meera (*quiet, to arjun*): "...it's not your fault."

(cut to black.)
